

# **Apps for Speech and Language**

## **Apps for Articulation**

**\*\***Many articulation apps are expensive (\$30-40 or more), **HOWEVER**, this is generally the case to purchase the *full* app with all sounds. Only the sound that your child is working on needs to be purchased, which greatly reduces the cost. Most articulation apps have a free or "lite" version and in-app purchases for a single sound range from \$2-7, with some exceptions. Please be sure to keep this in mind when looking to purchase an app for articulation practice.

**\*\***Please also know that prices are subject to change. The prices listed below were current when the list was constructed and are updated periodically.

Small Talk Phonemes (free)
